vectorle@protonmail.com | 1(626) 466-5067 | <https://linkedin.com/in/vectorle> | <https://github.com/VectorLe>

About Me

Professional Interests	Software Engineering, Front-End Web Development
Technologies	C, C++, C#, Git, HTML, CSS, JavaScript, MongoDB, Express, Node.js, Vim, Linux, Shell Script, Excel, and others
Languages	English, Chinese
Legal Status	American Citizen
Website	https://www.vectorle.xyz

Education

California State Polytechnic University, Pomona Expected Graduation Date: June 2020
Bachelor of Science, Computer Engineering, Cumulative GPA: 3.44
Dean's List: Fall 2016, Fall 2017, Spring 2019

Alhambra High School August 2012 - June 2016
Extracurriculars: All Male Dance (2014-2016), Cross Country (2013), Track & Field (2012-2014)

Projects

- VecPost — A web application that allows a user to create, view, edit, and delete posts. Learned how to use Node.js, MongoDB, Express, and how to implement RESTful routing. (<https://github.com/VectorLe/post-app>)
 - Maze Application — A Windows Forms application built with a partner for Software Engineering course using C#. Allows user to generate and play a variably sized maze. Primary role in developing a Solution button that implements depth-first search algorithm with a stack to solve the maze. Gained experience working with another developer. (<https://github.com/VectorLe/MazeApplication>)
 - Patatap Clone — Cloned the web application Patatap using Javascript libraries Howler.js and Paper.js. Learned how to read through JavaScript documentation and use libraries to complete a simple project. (<https://github.com/VectorLe/patatap-clone>)
 - Twitter Bots — Recreational side project to create bots using Google Spreadsheets using Twitter API following online tutorial. Bots can be found at @procrustesbed, @ArtOfWarTweet, and @PandaAphorisms. Bots automatically tweet a quote from Google Spreadsheets drawn from respective book/movie every 2 hours. Gathered about 40 followers on the most popular account.
